AIR CON MANAGEMENT SYSTEM

Powered by

D.I.S Technology Co,. Ltd

One platform , All services

OBJECTIVES

- The main goal of this system is to provide a simple and user-friendly platform where customers can easily request Air Con services.
- Technicians can manage jobs efficiently and complete work faster.
- Administrators can monitor and control all operations from one centralized system.

PROJECT SCOPE

- Customer login using phone + OTP
- Service request (Normal & Urgent)
- Appointment scheduling
- Automatic technician assignment
- Service tracking & warranty checking
- Cash payment recording
- Maintenance scheduling & reminders
- Admin reports and management

CUSTOMER FLOW

- Login with phone + OTP
- Choose service type (Normal/Urgent)
- Schedule appointment (if needed)
- System finds nearest technician
- Customer confirms request
- Track service status & warranty

TECHNICIAN FLOW

- View assigned service requests
- Accept or reject
- Perform service at customer location
- Update status (Pending/Completed)
- Receive cash payment

ADMIN FLOW

- Manage customers, technicians, and user roles
- Register Air Con units and warranties
- Assign technicians to service requests
- Set service fees (Normal & Urgent)
- Schedule maintenance and send reminders
- View reports for payments, services, warranties, and maintenance

CONCLUSION

- The system simplifies service from request to completion.
- Customers can request services easily and track progress.
- Technicians and admins can manage work efficiently.
- The system is user-friendly and fast for everyone.

THANK YOU !
